

MULTI BAG FILTER HOUSING

The multi bag filter housings are designed to meet high flow rates while maintaining the practicality and low economic impact of the filter bags.

Our range of mult sbag filters unlike other similar products on the market, ensures complete separation between the dirt chamber and the clean chamber, as the bag collar seat is made on a flange obtained by mechanical machining.

Our multi bag filters are manufactured in accordance with our high quality standards and in accordance with PED Directive 97/23 / EC and the most common international standards.

Multibag filters are available in both standard and special versions to ensure suitability for the application.

CHEMICAL &
PETROLCHEMICAL

FOOD & PHARMA

INDUSTRIAL

OIL & GAS

Applications

Chemical & Petrolchemical

- Process Fluids • Solvent

Food & Pharma

- Cosmetic • Prefiltration • Beverage and Water • Chocolate • Dairy • Pre-Prefiltration

Industrial

- Paints & inks production • Cataphoresis • Mechanic Industry • Paper Mills • Textile Industry

Oil & Gas

- Refinery process fluids

Water Treatment

- Prefiltration • Softening system protection • Water filtration

Energy

- Process Fluids • Gas separations & treatment • Water treatment
